Github: <https://github.com/vikashpandey-dev>

Proficient React Developer with a focused expertise in leveraging prominent frameworks including React.js Adept at meticulously architecting responsive web interfaces enriched with the finesse of Tailwind CSS.

SKILLS : - ReactJS, Redux, JavaScript, Postman, TailwindCss, HTML, Bootstrap, MUI.

EDUCATION

Bachelor of Computer Applications,

Swami Vivekanand Subharti University,

Core Subjects : - Programming for Problem Solving , Database Management System, Data Structures, Analysis and Design of Algorithms, Design Engineering, Operating System, Discrete Mathematics, Microprocessor and Interfacing, Web Programming, Theory of Computation, Compiler Design, Big Data Analytics, etc.

Jaunpur, UP

July 2019-August 2022

Higher Secondary School Certificate - HSC Science,

Sarvajanik Inter College.

Core Subjects :- Physics, Chemistry, Mathematics, Hindi and English.

Jaunpur, UP

July 2016-July 2018

PERSONAL PROJECTS

[Blog-App](#)

TechStack : JavaScript, ReactJS, NodeJS, Express, MongoDB, Redux, Bootstrap

- In the Blog-App, a key feature is the implementation of role-based authentication, which ensures that users have different levels of access based on their roles. There are primarily two roles: **Admin** and **User**
- **User Role:** Users with this role have limited access to the blog's functionalities. They can browse, read, and like the blogs but do not have the permission to modify or delete content. This role is ideal for regular visitors who want to engage with the content but do not need access to content management features.
- **Admin Role:** Admins have elevated privileges that allow them to fully manage the content on the platform. In addition to reading and liking blogs, admins can create, edit, and delete blog posts. This role is designed for content creators and managers who are responsible for maintaining the quality and relevance of the blog content

[Blog-App](#)

Tech Stack: ReactJS, JavaScript, CSS, HTML, Bootstrap

I developed a Portfolio App using ReactJS to showcase my projects, skills, and professional experience. The app features a clean and responsive design, ensuring an optimal viewing experience across devices.

- **Responsive Design:** Leveraged Bootstrap and custom CSS to create a responsive layout, ensuring the portfolio looks great on both desktop and mobile devices.
- **Smooth Navigation:** Implemented React Router for seamless navigation between different sections, including Home, About, Projects, and Contact pages.
- **Interactive UI:** Integrated interactive elements such as hover effects, animations, and modals to enhance user engagement and create a more immersive experience.
- **Code Optimization:** Focused on writing clean, modular, and reusable code, following best practices to ensure maintainability and performance.

This project not only demonstrates my proficiency in ReactJS but also my ability to design and develop a fully functional, aesthetically pleasing web application.
